

Jr. Graphic Designer  
based on Samsun

**TUNGAKAAN**

I'm a third-year student of Visual Communication Design at Ondokuz Mayıs University. I'm aiming to create unique and useful designs for my all projects. In line with this purpose I'm trying to find out much more things to increase my knowledge and skills in graphic design. In this portfolio, you will see the projects I have done throughout my education life. I think I can improve myself, especially in the field of poster design & UI/UX design.

I hope you like the designs.

Poster Designs

Just a few of the posters I have designed for different subjects and sectors. The posters that I have created with the aim of being simple and understandable are positioned at a very resounding level on the basis of the sector.
